BS Computer Science + Mathematics and Financial Engineering

St. Louis, MO
Sep 2020 - May 2023

WORK EXPERIENCE

Boondoggle AI
Co-Founder/CTO

San Francisco, California
June 2023 - July 2024

- Raised 280k+ from Venture Capital funding
- Developed product that deployed AI agents to automate CRM workflows and data hygiene scoring using LLMs, Vector Databases, and PyTorch
- Iterated based on customer feedback to save individual sales employees 5+ hours a week of manual data logging
- Scaled company revenue from \$ 0 - 1K MRR
- Managed a team of engineers with Agile sprint planning and daily stand-ups
- Built native AI integrations on top of 25+ CRM offerings ie: Salesforce, HubSpot, Affinity, etc

Boeing
Automation Engineer

St. Louis, Missouri
June 2022 - June 2023

- Pioneered the use of OpenAI technologies within Boeing, leading the first team to integrate AI capabilities into document generation workflows, resulting in faster and more accurate outputs.
- Enhanced the GUI of an MVP Python application to automate the generation of Technical Specification Design Practice documents for various departments, significantly improving UI and backend efficiency.
- Developed and maintained a network backend to streamline data extraction and document generation processes, reducing manual effort and increasing productivity.

Traits AI
Mobile Application Development Intern

San Diego, California (Remote)
June 2021 - August 2021

- Contributed to the development of Vita, a conversational AI healthcare app aimed at assisting older patients with medical appointments and advanced directive forms.
- Facilitated efficient healthcare planning by integrating texting modules for seamless communication between patients and medical professionals.

Hunter Engineering Company
Computer Science Co-Op

St. Louis, Missouri
June 2021 - August 2021

- Developed and tested user interfaces in React for forms extracting data from Azure backend, enhancing automation of car data and measurements.
- Specialized in web development and interface building for advanced automotive shop technology in an Agile environment.
